Projects

Football League Simulator

league-simulator-smoky.vercel.app

View league standing outcomes as you simulate match results.

• A web application for football fans to follow live match simulations, demonstrating real-time data handling and user engagement techniques.

- API integration with [API-Football](#)
- Data manipulation, and dynamic web content rendering
- Immersive user experience in league simulation

Ymaa Company Website

ymaadesentupidora.com.br

Fully functional website for a local business

- Improved online presence and customer retention by modernizing the frontend, moving from wordpress to React.
- Improved Lighthouse metrics; Seo, performance, accessibility, and Best Practices to reach over 95%

yalmeida.vercel.app

Portfolio Website

Professional showcase of my projects and skills

- A professional showcase of my projects and skills, available at <https://yalmeida.vercel.app>.

Experience

Team lead and IT support

TDX-Management

Toronto, ON, Canada

05/2023 - Current

- You could put TDX here - like you're consulting on transition from old system to new and creating app etc

Something

Ymaa Desentupidora e reformas

RJ, Brazil (remote)

05/2018 - 04/2022

- You could put TDX here - like you're consulting on transition from old system to new and creating app etc

Professional Development

Continuous Learning

• Actively engaging in self-paced learning to master new technologies and programming languages, with a recent focus on AI and machine learning.

Community Involvement

• Active member of local and online coding communities, contributing to open-source projects and participating in discussions about best practices and emerging technologies.
